KWENA MOKOKA

066 139 3062 | 1mokokakwena@gmail.com | github.com/KwenaMokoka | LinkedIn: Kwena Mokoka | Pretoria, Gauteng

PROFESSIONAL SUMMARY

Recent Software Development graduate (Boston City Campus, 2025) with hands-on Python/Django full-stack projects, Microsoft Azure AZ-900 certification, and practical experience in SQL databases, Docker, and Git. Currently employed at Bearing Man Group while actively transitioning into a junior developer or IT support role. Strong problem-solver who learns new tools quickly and communicates technical ideas clearly.

CORE COMPETENCIES

Python I Django I REST API I MySQL I SQL I Git I GitHub I Docker I Azure I HTML I CSS I CRUD I OOP I SDLC I Troubleshooting I Helpdesk

TECHNICAL SKILLS

Languages:	Python (primary), Java, Bash basics,
Web / Back-End:	Django, HTML, CSS, RESTful APIs, Authentication
Databases:	MySQL — CRUD, querying, optimisation, data integrity
Cloud:	Microsoft Azure (AZ-900 certified) — VMs, Storage, Entra ID
DevOps / Tools:	Docker (containerisation), Git, GitHub, GitHub Actions (CI/CD basics)
Other:	OOP, SDLC, Sphinx documentation, NLP basics,Helpdesk,Troubleshooting

WORK EXPERIENCE

Assistant Splicer | Bearing Man Group (BMG) *2025 – Present*

- Conducted 15+ routine equipment inspections weekly with 20% reduction in downtime.
- Collaborate across teams under deadline pressure — mirrors agile sprint dynamics.

Boilermaker Assistant | Ntshedi Lesiba Trading Enterprise *2022 – 2025*

- Fabrication, assembly, and configuration of components to strict safety and quality standards.
- Documented processes and procedures for team training and operational efficiency.
- Adapted quickly to changing priorities and high-pressure environments.

PROJECTS

Django High School Registration System — github.com/KwenaMokoka

- Built a full-stack web app using Python/Django with user authentication, group-based access control, and CRUD operations on a MySQL database.
- Implemented responsive HTML/CSS front-end and back-end logic for secure user onboarding and data management.
- Designed for deployment-readiness — containerisation-friendly structure with Docker in mind.

Library Management System — github.com/KwenaMokoka

- Java-based application with MySQL backend — full CRUD operations, data integrity enforcement, and efficient query optimisation.
- Applied OOP principles to create modular, maintainable architecture reusable across similar data-management problems.

Microsoft Azure Projects (x2) — Boston City Campus coursework

- Built Azure Entra ID (identity/access management) and cloud compute configurations as part of diploma modules.
- Gained hands-on exposure to VM provisioning, storage accounts, and identity management in Azure portal.

EDUCATION

Diploma in Software Development | Boston City Campus *2019 – 2025*
Relevant modules: Database Programming (SQL), Systems Development (Java/SDLC), IT Systems Management, Web Development

Matric (Grade 12) | Laudium Secondary School *2017*

CERTIFICATIONS

- Microsoft Azure Fundamentals (AZ-900) — Credential ID: 804FDB7CF8EA927 | Cert No: 60X3A8-C7AA1D
- Google: Elements of AI — 2025

LANGUAGES

English (Fluent) | Northern Sotho (Fluent)
